

AND NOW...THE FUTURE...

WHAT IS WIAT?

The park now has funding from *Woods In and Around Towns (WIAT)* to carry out thinning, tree planting, restoration of native species and the creation of cycle paths which are to extend as far as Roslin Glen. Bridgend hopes in 2020 to be offering bikes for hire to enjoy these facilities.

SAVING LOCAL PROJECTS.

This will not only improve the woodlands, and encourage native species and wildlife to thrive, but it will also ensure that work done over the many decades by groups of dedicated locals will endure. How many know that once Native Americans came to launch a massive tree planting initiative by local people of - as you'll see from our pix - all ages! Hearing about this from locals it was clearly an event that made a huge mark on memory.
